

# Seattle Cancer Care Alliance

## Fast facts

Seattle Cancer Care Alliance (SCCA) brings together the leading research teams and cancer specialists of **Fred Hutchinson Cancer Research Center, Seattle Children's Hospital, and University of Washington Medicine** to translate scientific discovery into the prevention, treatment, and cure of cancer. We transform groundbreaking research ideas into lifesaving realities for cancer patients, improving the standard of care regionally and beyond.

### National Rankings

- SCCA has been ranked in the Top 10 in the nation for Adult Cancer Care by *U.S. News & World Report* for 13 consecutive years.
- The first comprehensive cancer center in the Northwest
- SCCA is a member of the Alliance of Dedicated Cancer Centers (11 ADCC centers)
- SCCA is a member of the National Comprehensive Cancer Network (27 NCCN centers)

### Treatment Centers

SCCA offers two patient housing services — SCCA House and Pete Gross House — and 6 treatment centers:

- Seattle Cancer Care Alliance – South Lake Union, Seattle, Washington
- University of Washington Medical Center – Seattle, Washington
- Seattle Children's Hospital – Seattle, Washington
- SCCA at Northwest Hospital – Seattle, Washington
- SCCA at EvergreenHealth – Kirkland, Washington
- Affiliation with SCCA Proton Therapy Center – Seattle, Washington

### BMT and Immunotherapy – Global Leadership and Legacy

- Clinical use of bone marrow transplantation (BMT) was first developed at Fred Hutch more than 40 years ago and doctors at the Fred Hutch BMT Program at SCCA have performed more than 14,000 bone marrow transplants—more than any other institution in the world.
- Seattle Cancer Care Alliance is the only center in the Northwest selected to offer two FDA-approved immunotherapy treatments for people living with certain types of blood cancers, including lymphoma.
- Fred Hutch BMT Program at the SCCA was one of 17 stem cell transplant programs nationwide that outperformed its expected one-year survival rate for patients undergoing allogeneic transplants, and one of only 5 that have done so for the last 4 consecutive years.
- Clinical use of BMT has led to the development of Immunotherapy, and the SCCA's Bezos Family Immunotherapy Clinic plays an important role in the development of new immunotherapy drugs.
- Immunotherapy is one of the greatest clinical care advancements in our time and SCCA's doctors and nurses are the leaders in this revolutionary field with SCCA offering a broad range of immunotherapy options using T-cells, monoclonal antibodies, and gene therapy.

### Innovations

- We employ the latest innovative technologies: Proton Therapy, CyberKnife, intensity modulated radiation therapy (IMRT), RapidArc, TrueBeam STx, positron emission tomography/computed tomography (PET-CT) planning and SAVI Scout
- SCCA uses Clinical Pathways as a way to deliver high quality care through a multidisciplinary plan of best clinical practices for particular diagnoses. It is both a tool and a concept — incorporating guidelines and a consensus-driven, evidence-based best practice for a patient's individual care.
- SCCA uses a new diagnostic tool called UW-OncoPlex, a panel of tests on patients' tumor tissues for presence of characteristic genetic abnormalities called driver mutations. If your tumor tests positive for a particular mutation, your doctor will know which treatment will likely be most effective for you. The precision of UW-OncoPlex means that doctors can avoid prescribing treatments that are known not to work on cancers caused by specific mutations.

## Research by the Numbers

More than  
**130**  
new  
clinical trials  
started each year

Over  
**520**  
treatment and  
supportive care trials  
active at any given time

Percentage of all patient billable activity  
that is driven by research

About **1000** patients enroll in a  
clinical trial each year

## Affiliate Network

The SCCA Network provides community-based physicians with access to the latest cancer diagnostic and treatment information. Patients of SCCA Network Members have access to clinical research studies, and the ability to easily consult with an SCCA physician about their diagnosis and treatment plans.

### ★ Seattle Cancer Care Alliance

- 1 Olympic Medical Center (Sequim, WA)
- 2 Skagit Regional Health (Mount Vernon, WA)
- 3 MultiCare Regional Cancer Center (Tacoma, WA)
- 4 Confluence Health (Wenatchee, WA)
- 5 Kadlec Clinic Hematology & Oncology (Kennewick, WA)
- 6 Bozeman Deaconess Cancer Center (Bozeman, MT)
- 7 Summit Cancer Centers (Spokane, WA)
- 8 Katmai Oncology Group (Anchorage, AK)
- 9 St. Joseph Regional Medical Center (Lewiston, ID)
- 10 Hawaii Pacific Health (Honolulu, HI)

## By the Numbers

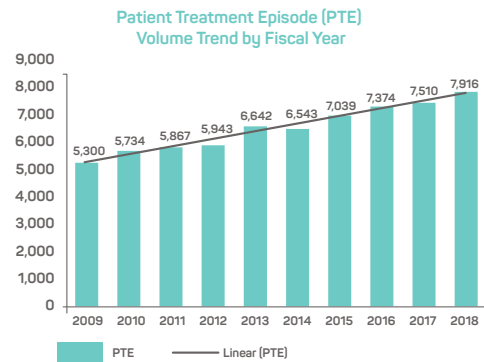

### Our People

- 16 Radiation Oncologists
- 10 Surgical Oncologists
- 143 Medical Oncologists/Hematologists
- 143 Advanced Practice Providers
- 1,756 Employees
- 2,512 Affiliates

### Our Numbers

- \$548.2M FY 2017 Net Revenue
- \$180M FY 2018 Research Grants (direct costs)

### Growth in Patient Treatment

### Growth in Unique Patients
