COVID-19 Screening Survey
(NWH)

1. Do you have any of the following symptoms?

- [ ] Fever
- [ ] Chills
- [ ] Cough
- [ ] Sore throat
- [ ] Shortness of breath
- [ ] Chest tightness
- [ ] Loss of smell or taste
- [ ] New onset of diarrhea
- [ ] Congestion (stuffy nose)
- [ ] Runny nose
- [ ] Muscle aches and pains

If No symptoms -> STOP - No further action required. Patient may enter the clinic to check-in. Give the patient an ‘I’ve been screened’ sticker.

If Yes, they have symptoms – **Instruct the patient to put on a mask (make sure it covers their mouth and nose)** and ask for further details of symptoms.

  - If the patient is wearing a cloth mask have them place their mask in a paper bag and put on a surgical mask.
  - Ensure the patient does hand hygiene before and after touching their mask(s).

2. Are you experiencing the following – Productive cough, fever or difficulty breathing?

If No to question 2 -> STOP - No further action required. Patient may enter the clinic to check-in. Give the patient a BLUE ‘I’ve been screened’ sticker.

If Yes to question 2, complete the following steps immediately:

- Make sure the patient is wearing their mask correctly
- Have patient wait at the bench outside of the clinic
- Ask the patient’s first and last name to give to a nurse
- Call the Nurse Backline to inform a nurse that a patient screened positive for more “severe symptoms” and needs to be taken back to a droplet precaution room. Provide the nurse the patients full name.

  - Nurse Backline: 206-606-5822
  - Charge Nurse Cell: 206-305-3366
COVID-19 Screening Survey
(NWH)

Symptom Screening – Arrival at the Clinic

1. Do you have a fever, chills, coughing, shortness of breath, chest tightness, sore throat, congestion (stuffy nose) or runny nose, loss of smell or taste, new onset diarrhea, muscle aches?

  No
  
  Yes, provide patient with procedure mask

  Any severe symptoms?
  Productive cough, fever, difficulty breathing

  No
  
  Yes

  Testing

  • Ensure patient is masked
  • Place the patient in designated room with the door closed
  • Place droplet precautions sign on door
  • Notify care team/nurse/provider, who needs to:
    • Ensure they are wearing the appropriate PPE (gown, gloves, mask)
    • Refer to SCCA Clinic COVID-19 and extended respiratory virus testing guidelines for information about testing if applicable
    • Prepare patient for possible inpatient admission

  Yes

  RN/MA Assessment in droplet precautions
  Does the patient have severe respiratory symptoms? (e.g. shortness of breath, RR>20, O2 saturation <=92%, fever>38)

  No
  
  Continue Droplet Precautions
  Refer to SCCA Clinic COVID-19 and Respiratory Viral Testing Guidelines for information about testing

All patients require a mask. If asymptomatic or not recently tested positive, they can proceed with their own mask or be given a procedure mask if they do not have their own. Patient may wait in the waiting area.

Droplet Precautions
• Ensure patient is masked
• Patient may proceed to clinic appointments
• Ask patient to sit in the least busy area of the waiting room if possible
