Course Description
This course is designed for medical oncologists, gastroenterologists, surgeons, radiation oncologists, mid-levels, GI nurses, and other health care providers who manage patients with GI cancers and who are interested in staying abreast of GI cancer clinical practices. A multidisciplinary panel of experts has been carefully selected and will discuss the most recent innovations in their respective fields. The goal of the meeting is to further the participants’ understanding of the management of GI malignancies, and discuss the most relevant developments in clinical care. Topics include the diagnosis and treatment of GI cancers, new developments in GI cancer treatment modalities and the multidisciplinary model of GI cancer management.

Learning Objectives
- Review recent developments and advances in the diagnosis and treatment of GI cancer
- Understand the treatment guidelines and best practices in the multidisciplinary management of patients with GI malignancies
- Identify new technologies and novel techniques for the management of GI cancers
- Discuss evidence-based research used to guide best practices in clinical GI oncology

Intended Audience
This conference is designed for physicians and allied health professionals who manage patients with GI cancers.
