Email: SCCAIssaquah@seattlecca.org

Seattle Cancer Care Alliance (SCCA) brings world-class cancer care closer to our patients' homes, offering oncology services in Issaquah. Our intake team coordinates appointments for consultations and treatment.

To support and expedite a patient referral, please send any of the following applicable information: Patient contact information, a clinical summary, pathology report, recent imaging, and labs

➔ Treatment options closer to home

New oncology services in Issaquah

The SCCA Issaquah Clinic provides comprehensive cancer care including medical oncology, infusion therapy, hematology, phlebotomy, nutrition and social work. Care will be provided in a universal room, facilitating various levels of treatment within the same unit. The clinic design supports a personalized, seamless, high quality and healing experience.

Hours of operation and location

- Monday – Friday, 8 am – 5 pm
- 1740 NW Maple Street, Suite 211, Issaquah, WA 98027
Located on the 2nd floor of the Highmark Medical Center Building

Quality care coordination

The Issaquah Clinic team will communicate with referring providers and patients throughout the scheduling and referral process. For standard of care treatment, patients will be seen at our Issaquah clinic. If a patient seeks advanced treatment options (e.g. bone marrow transplant or cellular immunotherapy), patients will have the option to receive more specialized care on our main campus in Seattle.

When a patient receives care at our Issaquah Clinic, referring providers will receive a discharge summary at the end of treatment which includes treatment response, recovery and follow-up requirements. Our care team will be responsible for coordinating any follow-up tests and will share relevant information with referring providers to achieve safer and more effective care.

For more information, please email sccanet@seattlecca.org.

Jason Lukas, MD, PhD

Hematologist/ Medical Oncologist
Medical Director, SCCA Issaquah

Clinical Expertise

Immunotherapy, cancer vaccines, internal medicine

Education and Training

MD: Drexel University School of Medicine

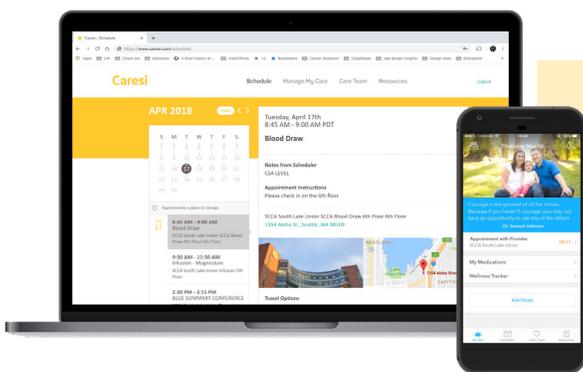

Residency: University of Washington

Fellowship: University of California, San Francisco

PhD: University of Southern California

Dr. Jason Lukas has worked in the Hematology Oncology, Immunotherapy and Internal Medicine field for the past 13 years. He knows that patients often feel perplexed by the complexity of their illness so he hopes to relieve that burden by charting out the most state of the art therapeutic treatment approach to meet the needs of each individual in his care.

Dr. Lukas enjoys travel, photography, reading, black and white cinema along with a variety of outdoor activities including hiking, camping, and biking to the Issaquah clinic for work.

Caresi® is a personal health app, created by SCCA for our patients. With the app, patients can view their schedule, access lab results, contact care teams and review resources. To learn more or sign up, visit: caresi.com.
